

8. ACKNOWLEDGEMENT

This present study was carried out in the Departments of Veterinary Pathology, Faculty of Agriculture, University of Miyazaki and Miyakonojo Meat Inspection Office during the years 1994-1998. In order to get results, the facilities and instruments of the laboratories were used.

I wish to warmly thank all those who have generously contributed to the present study in many different ways. My special warmest thanks are due to emeritus Prof. Dr. Susumu Tateyama and Prof. Dr. Ryoji Yamaguchi the head of the Department of Veterinary Pathology. They have been my patient inspiring supervisor and have guided me to the Pathology of Tumors in Domestic Animals. I am likewise indebted to Assist. Prof. Dr. Kazuyuki Uchida for his skillful technical assistance and stimulating discussions especially during preparing the manuscript is gratefully acknowledged.

Moreover I would like to express my deep thanks to Assoc. Prof Naoaki Misawa Ph.D. the Department of Veterinary Public Health and Prof. Dr. Noboru Murakami Ph. D. the Department of Veterinary Physiology, Faculty of Agriculture, Miyazaki University, for their kind encouragement during finishing this manuscripts

I wish thanks to all members of meat inspectors and present director Nobuo Yuji at Takasaki Meat Inspection Office, and previous director Yasuyuki Kanda at Hyuga Meat Inspection Office, and previous directors Hayashi Seguchi, Hisataka Nasu, Kouichi Sakihama at Miyakonojo Meat Inspection Office, and present director Yoshihiro Kawabata and previous Takanori Terada, Yasuaki Kai at Hygiene Management Division of the Miyazaki Prefecture.

Finally, I would like to thank my dear wife. Her understanding, never failing support and optimistic attitude to life have been invaluable. She took care of my children

so that I could study and work without any disturbance.

To other relatives and friends who helped me outside of my studies, I also appreciate very much.

KAZUNORI KUMAMOTO
